WEB Technology - Assignment 1

⇒ Structure Tags:

<!DOCTYPE html> - Tells the browser this is an HTML5 page.
<html> - Root tag, the whole page is inside it.
<head> - Head section, contains page information, not visible content.
<title> - Page title shown on the browser tab.
<meta> - Gives information like character set & mobile width.
<link> - Links the external CSS file (style.css) to the page.
<body> - All visible content of the page is inside it.

⇒ Layout / semantic Tags:

<nav> - Navigation bar at the top of every page.
<main> - Main content of the page.
<section> - A separate section of content, used for the hero section.
<footer> - Bottom part of the page with project and contact info.
 - A box/container used to group & style content, used for cards, boxes and layout.

⇒ Heading & text Tags:

<h1> - Biggest heading, main title of a page.
<h2> - Second-level heading, for section titles.
<h3> - Third-level headings, for card and team member names.
<p> - Paragraph of normal text.
 - Makes text bold and important. (i.e. used for labels: Date & Venue)
 - Small inline part of text.

⇒ Link, list & image tags:

<a> - Creates a clickable link, used in the navbar and buttons.
 - Unordered (bulleted) list, used for the navbar links.
 - One list item inside a list, each navbar link is an <li>.
 - Ordered list (1., a., i.).
<img> - Shows an image, used for the hero and event card images.

CamScanner
